Go ask Alice

By Anonymous

Go ask Alice is a heart string pulling, on the edge biting your nails diary entries about a troubled teen finding her self through drug experiments. From trying them in the basement of one her friend's house sniffing a line. To exchanging bags of acid with grade school kids so she can spend time with her boyfriend or what she thought was her boyfriend.

Along the way she meets other addicts that take her under their wings. Along with the troubles that the street provides when you're heavily drugged.

Almost a year later being bullied almost every day at school by the druggies and getting jumped by them while just walking down the street to get some coffee. She then ends up in the hospital from an overdose on acid that was sprinkled on some chocolate covered peanuts that were slipped to her from Jan. The head druggie. The charges were put on Jan pleading to the judge not guilty and then having failed. Alice then had to be escorted to an insane asylum where she finally gets clean for good. She throws in the acid, heroine, etc, and comes to realization that this isn't for me. I'm tarring myself from the ones I love, and slowly killing myself.
