

Have You Ever Realized What Kind of Life You Have?

There's only one life and a couple of chances.
If you get a chance, take it.

If it changes your life, let it.
Things happen for a reason,
And we're supposed to look ahead.
Life goes on
And is not for us to be living with regrets,
Because in that moment
It was exactly what you wanted for to happen.
So live your life.
Smile and laugh as much as you can.
Life is short and goes on so fast.
So cherish every moment.
Appreciate every thing you have.
Because you won't ever be happy with what you
have.
Until you see it lost.
So be happy with every thing you have.
And for the things you've lost.
God took away the good to bring you the better.
Take too many pictures, travel, laugh a lot.
Be with your loved ones, have fun in the
responsible way as well.

Because every 60 seconds of your life you live with regrets,
is a minute of your life you'll never get back..
